

Tray former makes packaging child's play

New equipment from Eagle Packaging (Booth S2587) helps a toy maker upgrade its line.

Eagle Packaging Machinery (Booth S2587) recently installed a complete system at MEGA Brand, a toy manufacturer located in Montreal, Que., to form a variety of trays with lids and after the trays were filled with an assortment of toy parts, the trays were sealed with a tray lid sealer to complete the job.

MEGA Brands was installing a new line of equipment requiring a tray former that could handle a variety of different tray sizes. They required quick size changeover capabilities to be able to switch between the different sizes within an eight-hour shift. After looking at a number of other manufacturers, MEGA Brand was satisfied that Eagle could supply the machine they were looking for.

The Eagle VASSOYO Mechanical Tray Erector is designed for 24 hour-a-day operation at speeds up to 45 trays per minute. MEGA Brand was guaranteed consistent output with minimal down time and maintenance. The Lidder tray lid sealer was also built to meet the specific needs of MEGA Brand including handling the trays with product and closing the lid with glue on three sides.

The main features of the VASSOYO Mechanical Tray Erector include: heavy duty, welded steel frame, mechanical low maintenance drive, sealed ball bearings in the blank trans-

fer section with self cleaning tracks, venturi vacuum technology for tray extraction from the hopper, Omron programmable logic control, and a Nordson glue system. The color touchscreen user interface allows adjustment of glue patterns, trouble shooting and full access to all functions and timing of the machine.

MEGA Brands provides stimulating creative experiences for children and families through innovative, well-designed, affordable and high-quality products that are marketed worldwide under leading brands such as: MEGA BLOKS, ROSE ART, MAG-NEXT and BOARD DUDES. MEGA Brands is a global organization based in North America, with a sales and distribution network that reaches over 100 countries.

Eagle Packaging Machinery LLC is a U.S. manufacturer of tray forming and case erecting equipment. Established in 1998, Eagle has developed a diverse product line that includes the capability of forming and sealing corrugated trays or cases with glue, tape, and/or self-locking. With installations worldwide, Eagle has designed, engineered and successfully installed machines in a diverse range of industries including: beverage, apparel, health, beauty, printing, pharmaceutical, automotive, bakery, food and for a wide variety of consumer products. **SD**

MEGA Brand manufactures a wide range of toys with varying packaging configurations, including Halo MEGA BLOKS.

With its new **Eagle (Booth S2587)** VASSOYO Mechanical Tray Erector, MEGA Brand is able to quickly changeover between different sizes multiple times within an eight-hour shift.
